# RIGHT STYLES

# and RIGHT FIT

Right Styles and Right Fit, along with Right Materials and Right Prices, are noticeable points in our range of Coats and Suits for Fall and Winter.

The Coats are of beautiful materials, such as Chinchillas, Curl Cloths, Blanket Cloths, Plushes and other heavy material, in plain or mixed colors and plaids. In many Coats, particularly in the collars, the Military influence is shown. while others are in Redingote and Flare Effects. Belts are used on both Coats and Suits. Coats range in price from

\$12.50 up.

Suits for Fall are shown in Serges, Gabardines, Broadcloths, and Mixed Tweeds in Navy, Black, Brown, Green and Mixed Grey. Box, Flare, Tailored and Belted Styles are all correct, and the lengths of jackets vary according to styles. Skirts are chiefly gored and pleated effects, and are from 2 to 21/2 yards in width. Pockets and Belts are freely used.

# School Suits

Nearly every mother of a healthy, active boy knows how she has bought him a School Suit that looked very well, indeed, and then wondered a few weeks later how the suit could possibly have grown so wrinkly, so shabby and so shapeless.

We recommend our School Suits to mothers who have had just this sort of experience. All of the Boy's Clothing we sell is Tailored as it ought to be—and Tailor work is the only thing that will make a suit-hold its shape in active

We select only the most reliable fabrics. We have them made up with all the care and thoroughness they ought to have, and as a result our School Suits will wear and hold their shapeliness to an unusual degree.

The Fall Styles are smart and new. There is a very broad variety from which to make a choice. Correct fit is assured. Prices are very moderate, indeed, considering the splendid values we give.

# School Suits

Nearly every mother of a healthy, active boy knows how she has bought him a School Suit that looked very well, indeed, and then wondered a few weeks later how the suit could possibly have grown so wrinkly, so shabby and so shapeles.

We recommend our School Suits to mothers who have had just this sort of experience.

All of the Boy's Clothing we sell is Tailored as it ought to be-and Tailor work is the only thing that will make a suit hold its shape in active

We select only the most reliable fabrics. We have them made up with all the care and thoroughness they ought to have, and as a result our School Suits will wear and hold their shapeliness to an unusual degree.

The Fall Styles are smart and new. There is a very broad variety from which to make a choice. Correct fit is assured. Prices are very moderate, indeed, considering the splendid values we give.

# School Suits

Nearly every mother of a healthy, active boy knows how she has bought him a School Soit that looked very well, indeed, and then wondered a few weeke later how the suit could posssibly have grown so wrinkly, so shabbly and so shapeless.

We recommend our School Suits to mothers who have had just this sort of experience.

All of the Boy's Clothing we sell is Tailored as it ought to be-and Tailor work is the only thing that will make a suit hold its shape in active

We select only the most reliable fabrics. We have them made up with all the care and thoroughness they ought to have, and as a result our School Suits will wear and hold their shapeliness to an unusual degree.

The Fall Styles are smart and new. There is a very broad variety from which to make a choice. Correct fit is assured. Prices are very moderate, indeed, considering the splendid values we give.

# School Suits

Neatly every mother of a healthy, active boy knows how she has bought him a School Soit that looked very well, indeed, and then wondered a few weeks later how the suit could possibly have grown so wrinkly, so shabby and so shapeless.

We recommend our School Suits to mothers who have had just this sort of experience.

All of the Boy's Clothing we sell is Tailored as it ought to be—and Tailor work is the only thing that will make a suit hold its shape in active

We select only the most reliable fabrics. We have them made up with all the care and thoroughness they ought to have, and as a result our School Suits will wear and hold their shapeliness to an unusual degree.

The Fall Styles are smart and new There is a very broad variety from which to make a choice. Correct fit is assured. Prices are very moderate, indeed, considering the splendid values we give.

Can't Afford Handicaps

In a remarkable test, recently made under the supervision of a western Board of Health, 2000 school children were questioned as to what they are for breakfast. A large percentage of the breakfasts consisted of coffee, bread and butter; coffee and oatmeal or some other cereal; coffee and hoteakes; coffee and biscuits; roffee and coffee cake, or coffee alone. Probably the same conditions prevail generally.

They wait, high up, two or three together, for the chance of being able
to pounce on a lonely flyer; but they
have done nothing yet which would
suggest very great confidence in themselves or their machines. A young
German airman in the early, days of
the war asked how he would know the
British machines if he met them. "Oh, you'll know them right enough," was the reply. "They'll attack you." The German can still
count on that distinguishing feature.

At Less Cost-There's more nutritive value that the system will absorb in Grape-Nuts than

in either meat or bread.

Weight for weight, a package of Grape. Nuts supplies one-third more nourishment than a roast of beef and at about half the cost. A roast of beef is about twenty per cent. waste and there is a strinkage in cooking. Grape. Nuts comes ready cooked—and not a crumb need be wasted.

Then there's bread-white bread lacks certain elements esnone there's bread—while bread lacks-certain elements es-sential to building brain and body. Why? Because in milling white flour, four-fifths of the precious mineral content (all im-portant to health and life) is thrown out with the brancost of wheat, to make the flour look white and pestig.

#### LIBERAL NAVAL POLICY.

The Toronto Star is once ugain a follower of Sir Wilfrid Laurier-vinkiling in the political firmament.

We have read the Editorial articles of Opposition succeed at and quistion-in that sournal of late more (re-ed the goad faith of the Admiralty quietly than in the past, the reason, when 'it requested that Canada being that on the whole it has taken a handle provide for the common de-aptricial fine; and has seemed. being that on the whole it has taken should provide for the common do-a participle line; and has seemed (acces of the Empire three of the anxious to avoid the discussion of largest ships which "science round party polities," We are sorry to haid and money samply." Now note that it has departed from this that we are feer to face with the note that it has departed from this that we are face to face with a commendable practice. Evidently the strain upon its forberance was of the conference of political procivities. It is a very been a time for humination to good illustration of how the Liberal, and not the moment to Press, adheres to the policy—of gloat over the fact that an Austral which they prate so much—of not ian cruiser is assisting in the protection of Canada.

the Liberal Press would have been silent above all others—Canada's failure to lend a hand in Imperial naval defence—is the very on about which the Star has broke through its praiseworthy practice of acciding party politics. The ap-pearance in Canadian waters of the Australian cruiser Sydney has beer the undoing of the Star. The Sydthe unideng of the Star. The Syd-may will be remembered with grids to the star of the Valids State-tude as the cruiser which conserved and crushed the will Emilea, which the State of the Arabe sho-thered are not and the State of the did so much damage to British of lower, and is not all the tense measurements to be force to weak the state of the tense of the state of the State of the State of the State of the lower, and is not all the tense to the state of the State of the State of the State of the lower, and is not all the state of the lower, and is not all the state of the lower of the State did so much damage to British merchant vessels before she was laid The fact that it was necessary that an Australian cruiser should form part of Canada's naval protect form part of Canada's naval protec-tion we should have thought would have shamed Canadians; but instead of that the Star endeavors to make of that the Star endeavors to make political capital out of it. The point urged is that if Sir Wilfrid adurative positive political capital been carried with a control of the political capital capit ment would have at their disposal ta few Canadian cruisers" which would be of incalculable value at

the present time.

The Star evidently needs remin ing that from 1890 to 1910 the Laurier Government contributed not one solitary dollar to the naval one solitary dollar to the naval defence of the Empire. In 1907 Sir Wilfrid Laurier told the Imperial Whom these forcettle shill do share Conference in London that he was prepared to vote against a resulta-tion arging the Overseas Domin-lians to take some store. It is to prepared to twie against a re-ision urging the Over-exes Domini-ison to take some share fit the lure does not Naval Deforce. In 1995, Illouding a time of anyscalided and Yalifak shand was forced by the Conservative purry, and deeping a gentlarities that the did not think Carinda 'shall been genisis in the district of the control of deep in the pass,' he was compelled deep in the pass,' he was compelled any disconsibility in great to Imperial variety and the control of the control of the control of the Sya'ral Deforce. Sir Wilfrid moved a vague and includint resolution, in which the promised action. Several the control of the control of the control of the control of the deep in the pass,' and the pass of the control of the control of the say disconsibility in the control of the control of the control of the Sya'ral Deforce. Sir Wilfrid moved a vague and includent resolution, in the control of the control of the disconsibility in the control of the control of the control of the control of the say of the control of the control of the control of the control of the disconsibility of the control of the objectionable clauses in the resolu-tion were dropped at the earnest solicitation of Sir Robert Borden. Six Liberals who discussed the re-solution declared that Canada was under no legal obligation to aid the under no legal obligation to aid the Motherland; contended that Canad-lans were doing all that they were morally bound to do without con-tributing towards naval defence; eulogized the Monroe Doctrine as the real protector of Canada, and hinted at Canadian independence. mirce at Canadian independence 'An 1910 Sir Wilfrid Laurier re-fused to accept the Admiralty's sug-gestion that Canada establish one fleet unit on the Pacific. Instead, he decided to build two sets of light

cruisers, too weak to be effective,

for the defence of the England's wars. Several promin-ent Liberals openly talked of Cantion that the Canadian navy might hold aloof from certain of the Em-pire's wars. Laurier promised naval

NDARD ARNOLE

There are ninety-eight cadets ceroil-ed at the Royal Milliary College, sixty-four being recruits. The other two classes, are very small, owing to so-many of the previous members having taken commissions in the British and Canadian, expeditionary forces. The wable of North Ferth is awakened to the need for men for the front, and the recruiting officials expect a fine response in Listowel this week.

#### PAYMENT OF M.P.'s

There has been some perti ently among members of Parlicent in Great Britain in cons quence of the suggestion that Par liament about effect an economy by stopping the salaries of mem-bers during the war. Members car now breathe freely, for the Chan cellor of the Exchequer has stated that the salaries of members are assured. Had the suggested course been adopted it would have effected a saving of a quarter of a million pounds a year, or about a milli-and a quarter dollars.

The payment of Members

Parliament a salary of £400 a year or about \$40 a week, was an it vation introduced by the Liberal Government without any ma from the country, and entirely to please the Labor party. Payment was not asked for by anybody else, and the gross inductive of average of the country of th and the gross injustice of paying men, rolling in riches, \$40 a week for doing work they had always be-fore been pleased to do for the honor, was strongly condemned a the time. No conditions were laid down as to attendance to duties.

An instance as to how the injustice to the flex purpose works out is the case of the Hun. Joe Martin, of Beijak Chudhuk, won't represents' Early St.; Panerus in the Libera line terest. The Concernations of the Hun. CURRENT COMMENT terest. The Conservatives of the constituency recently passed a resolution deploring the fact that while voluntary service called for a con pilation of national register, for hundred pounds yearly is being paid to the member for the division, who had been in Canada over a year.

#### AID TO FARMERS.

Who should have the credit of aiding the Farmers is answered by Mr. Arthur Sauve, M.L.A. for Two Mountains, Quebec. This gentle-man, at a public meeting, discussed this question fully, pointing out that the real friends of the Farmer were the Members of the Conservative rederal Cabinet and not those of the Quebec Cabinet, who were claiming the credit for what had been and was being done. In his remarks to the electors he said:—

### CANADA: COASTING

" A telegram from Cleveland, Ohio "A telegram from Cleveland, Ohio, of the 20th Sept. says: "The Lake Carriers: Association has been of-ficially notified that the Canadian coasting laws have been suspended, allowing American ships to trade between Canadian lake ports during the remainder of the season. A letter received from Washington states that the Department of Commerce received the following com-munication from Consul Starret in Fort William: "Reports reached here from Ottawa that the Domin-ion Government had decided to permit American ships to trade between Canadian ports."

Canadian Government can only be justified, (unless the United States Government, has made a like con-cession to Canada, allowing its ves-sels to trade during the season besels to trade during the season be-tween United States ports), on the ground of insufficient Canadian ves-sels at present to handle the grain crop through the great lakes, which in all probability is the reason for the action of the Government. During the navigation season of

1914 there were 605 vessels of Can-adian registry exployed in the grain carrying trade on the Great Lakes, their total tennage being 350,000 Owing to the transfer of many of these ships to the ocean trade, the Canadian ships, with co

thorities have persistently refused upon the question of the coasting laws, up on the Great Lakes though Canada was prepared to enter into competition with Ameri can ship owners. The bountifu western crop of the year, the scare ity of vessels on the lakes to movit, and the necessity of war supplied of food being moved rapidly justific the action of the Government in this particular, which cannot but be approved by Canadian ship owners.

THE PPET'S CORNER

The ghostly resides trembled From rulined sterns to prove; What was this ching of terror That broke their vigil now? Down through the startled ocean A mighty vessel came. Now white, as all dead ships must be, But red, like living flame!

But red, like bring flame!
The pole green waves about her
Were swiftly, strangely dyed!
By the greater swarles stream that
From out her wounded side.
And all her decks were scarles!
And all like shattered eree,
Shipe
And Stalined them through and
through.

If went not forth to battle,
I carried friendly men.
The children played about my deels,
The women sang — and then—
And then—the sam blushed scarle.
And then—the sand blushed scarle.
The world that God created
Became a slameful place.

When God's great voice assembles.
The fleet on Judgment Day.
The ghosts of trained ships will rise
In see and strait and bay.
